View of the North end of the connection in-between Two existing buildings completed.

View of construction of the addition in-between two existing buildings

Center Manufacturing was growing at a fast pace. This required a plan, to manage the necessary spatial changes that would be required. The master plan was completed in the spring of 1977. Several additions were added since that time. All construction projects that Vermurlen Architecture completed are noted. The Master Plan designed by Vermurlen Architecture was followed completely. There have been three additions that Vermurlen Architecture was not envolved with.
